EDUCATION

B.S. Informatics, **University of California, Irvine** June 2027, GPA: 3.9 | Dean's Honor List

Specialization: Human-Computer Interaction, Minor: Health Informatics

Relevant Coursework: Human Computer Interaction I & II, User Interaction Software, Engineering Artificial Intelligence Software, Software Design, Project Management, Requirement Analysis and Engineering

SKILLS

Design: Interaction Design, Visual Design, Wireframing, High-Fidelity Prototyping, Information Architecture, Design Systems, Accessibility Guidelines (WCAG), Web & Mobile Design, A/B Testing, Dashboard Design

Research: User Research, Usability Testing, User Interviews, Competitive Analysis, Requirements Analysis

Tools: Figma, FigJam, HTML, CSS, JavaScript, Angular, Python, SQL, Claude, Github

EXPERIENCE

UC Irvine Student Center & Event Services, UI/UX Designer

Jun 2025 - Present

- Gathered reporting requirements from managers and HR staff for Level Up, an internal workforce management platform, translating reporting needs into employee-status dashboards, data visualizations, and interactive reporting controls.
- Leading end-to-end product design strategy and branding for the UC Irvine Esports mobile app, creating high-fidelity prototypes and reusable UI components for PC availability, rewards, and event discovery features; iterating through usability testing

Design and Partnership Lab, Design Lead

Sep 2025 - Present

- Designed dashboard information architecture and user workflows for an internal AI tool with 100+ users, translating complex information into usable interfaces.
- Synthesized surveys and usability tests with 30+ participants to identify behavior patterns and usability needs that informed product design decisions.
- Designing user flows and conversational interactions for an AI-powered assistant in collaboration with Tufts University, helping preschool educators integrate cultural family knowledge and scientific standards into classroom activities.

CareNiva Inc., UCI PHIT Program Intern - UX Design & Data Analyst

Jun 2026 - Sep 2026

- Conducted competitive UX analysis of 10 telehealth platforms and co-authored a heuristic evaluation identifying 15 usability issues; recommended improvements to pricing clarity, product demonstrations, trust signals, and support resources.
- Developed Python and SQL workflows to extract, filter, and clean approximately 2.18 million healthcare provider records, supporting provider research and data-driven outreach.
- Created the initial data-analysis workflow that informed a team-built AI agent, enabling nontechnical stakeholders to search and export provider information through natural-language queries.

OPENEDGES Technology Inc., Product Design Intern

Jun 2024 - Aug 2024

- Redesigned dashboard screens and user flows for a managed filed transfer (MFT) platform dashboard, collaborating with engineers to refine usability, accessibility and functionality.
- Collaborated with engineers and created flowcharts to refine accessibility and functionality.

DESIGN at UCI, UI/UX Designer

Oct 2023 - Nov 2023

- Won 1st place for designing and prototyping an Augmented Reality (AR) furniture visualization app that allows users to preview items in their own space.
- Presented design process and product functionality to a panel of industry experts in a cross-functional team.
