EDUCATION

B.S. Informatics, **University of California, Irvine** June 2027, GPA: 3.9 Dean's Honor List

Specialization: Human-Computer Interaction, Minor: Health Informatics

Relevant Coursework: Engineering Artificial Intelligence Software, User Interaction Software, Human Computer Interaction I & II, Software Design, Project Management, Requirement Analysis and Engineering

SKILLS

Tools: Figma, FigJam, Miro, Canva, Vercel, Claude, Codex, Adobe Creative Suite

Data Analytics: Data Extraction, Data Cleaning, SQL

Design: Interaction Design, Visual Design, Wireframing, Prototyping, Information Architecture, Design Systems, Accessibility Guidelines (WCAG), Web Design, Mobile Design, Use Case Diagramming, Typography, Storyboarding, Requirements Documentation, Affinity Mapping, A/B Testing

Research: User Research, User Interviews, Competitive Analysis, Usability Testing, Survey, Qualitative Research, User Personas

EXPERIENCE

CareNiva Inc., UCI PHIT Program Intern - UX Design & Data Analyst

Jun 2026 - Sep 2026

- Contributed to an AI-assisted provider-search project using NPPES, NUCC taxonomy, and geographic data (~2.18M practitioner records); supported location/specialty queries and exportable results for provider outreach research.
- Co-authored a heuristic audit of a B2B telehealth website, documenting 15+ usability issues.
- Compared 10 telehealth competitors across various features, translating findings into recommendations for product reviews, trust messaging, and support resources.

Design and Partnership Lab, UX Design & Research Assistant

Sep 2025 - Present

- Designed dashboard information architecture and user workflows for an internal AI tool with 100+ users, translating complex information into usable interfaces.
- Synthesized surveys and usability tests with 30+ participants to identify behavior patterns and usability needs that informed product design decisions.

UC Irvine Student Center & Event Services, UI/UX Designer

Jun 2025 - Present

- Collaborated with Student Center managers and HR staff to translate reporting requests into dashboard designs for Level Up, an internal tool tracking employee training and workforce information.
- Conducting end-to-end product design strategy and branding for the UCI Esports mobile app that aims to improve event discoverability for 35,000+ students.

OPENEDGES Technology Inc., Product Design Intern

Jun 2024 - Aug 2024

- Redesigned the managed filed ttransfer (MFT) platform dashboard and pages, improving usability and feature alignment with company goals.
- Collaborated with engineers and created flowcharts to refine accessibility and functionality.

DESIGN at UCI, UI/UX Designer

Oct 2023 - Nov 2023

- Won 1st place for designing and prototyping an Augmented Reality (AR) furniture visualization app that allows users to preview items in their own space
- Presented design process and product functionality to a panel of industry experts in a cross-functional team
